CBF (CONTRACT BROILER FARMING)

PoulBIS* is a erp system to control over entire contract broiler farming business integrated with inventory and accounts. It helps to poultry business owner to get realtime data , production and costing reports with the help of branch accountant, RO accountant, ETS(Line Supervisor) , sales executive and weighment supervisors. This product is upto date with all required financial (Branchwise Profit /Loss, Trail Balance , Balance Sheet , GST reports etc)reports.

FEED MILL PROCESSING

In our erp feed mill module integrated with our another modules (CBF,Breeder, Layer). Feed Mill owner get realtime product cost of produced Feed with the help of predefined formula. Just need to setup formula with ingredients and production will give you actual cost of produced feed (FIFO Algorithm).

BREEDER MODULE

In Our ERP breeder module is integrated with hatchery module and can be sold out.

In Breeder Parent Male & Female will be placed in shed's line and named as Flock (With flock number)- it will describe as flock number with mean age.

This module is divided into two parts 1)- Brooding 2) Laying.

The purpose of this is to get realtime costing of Produced Hatching Eggs.

HATCHERY MODULE

In Our erp hatchery module get inputs from breeder's laying or from purchase of eggs and will set in setter and transfer into hatcher to complete the hatch process. Produced chicks can be sold out or transfer into CBF .the purpose of this module is to compute the cost of produced DOC Broiler Chicks.

LAYER MODULE

In Our layer erp interated with feedmill is for trading and account with inventory management. Owner Will get real time cost of produced egg.Female bird will placed after purchase
and called as flock .

Farm supervisor enter the daily report and production entry. This will give you all financial (Branchwise Profit /Loss, Trail Balance , Balance Sheet , GST reports)reports.

TRADING MANAGEMENT

In Our erp Broiler Trading management system owner will do purchase entry with vehicle no and sold out lot with their customer. Daily sync and profit loss report will be up to date.

This will give you all financial (Branchwise Profit /Loss, Trail Balance , Balance Sheet , GST reports)reports.
